Course policies

Late work. Problem sets submitted late lose 10% per day, up to three days. After three days they receive no credit unless you have an approved accommodation. Lab reports cannot be submitted late because they are discussed in the following lab section.

Generative AI. You may use AI tools to check your understanding of a mechanism, but every answer you submit must be your own work. If you use an AI tool, add a short note saying how you used it.

Academic integrity. Riverbend University expects every student to submit their own work. Copying answers from another student or from an online solutions site is an academic offence and will be reported.

Accessibility. If you need accommodations, contact Student Accessibility Services early in the term so arrangements can be made before the first midterm.
