PSYC 1010: Introduction to Psychology

Lakeview College · Winter 2027 · Section 002 · Instructor: Prof. Marta Okafor (mokafor@example.edu)

This course introduces the scientific study of behaviour and mental processes. We begin with research methods and the biology of behaviour, then move through sensation, perception, learning, memory, development, personality and social psychology. Each week combines lectures with short in-class activities.

Lectures meet Tuesdays and Thursdays from 11:30 AM to 12:50 PM in Harbour Hall 105. Bring the weekly reading to class; activities build directly on it.

Reading Response 1 is due Friday, January 22, 2027 at 11:59 PM. It asks you to summarise one research study from Chapter 2 in about 400 words.

Reading Response 2 is due Friday, February 12, 2027 at 11:59 PM. Choose a study from Chapters 5 or 6 and explain its method and main finding.

The Midterm Exam is on Thursday, February 25, 2027 during class. It covers Chapters 1 to 6 and has multiple-choice and short-answer questions.

The Research Proposal is due Friday, March 26, 2027 at 11:59 PM. Work in pairs; one partner submits the proposal on the course site with both names on the title page.

The Final Exam takes place during the April examination period. The date will be published by the Registrar.

Grading: Reading responses 20%, Midterm Exam 25%, Research Proposal 20%, Final Exam 35%.
